SUMMARY:

Technology and innovation-driven professional targeting challenging roles in the IT industry within Front-End Development to leverage analytical skills for mutual growth. Proficient in JavaScript, React.js, Redux, HTML, and CSS.

TECHNICAL SKILLS:

- **Programming Languages, Libraries and Frameworks** - JavaScript, React.js, Redux, jQuery, Bootstrap, Tailwind CSS
- **Web Technologies** - HTML, CSS, AJAX, Responsiveness, Progressive Web Application, Service Workers, Web Workers
- **Development Tools** - Git and GitHub, Version Control, Postman, Unit Testing, Visual Studio Code

EXPERIENCE:

SDE 1 Front-End Developer - Safety Labs Inc | September 2022 - June 2024

- **Dynamic Web Interfaces:** Leveraged **React.js** and **Redux** to create dynamic and responsive interfaces for a U.S. healthcare provider, using component-based architecture to enhance UI reusability and scalability.
- **Performance Optimization:** Implemented advanced **JavaScript** techniques in **React.js**, achieving a 30% improvement in page load times through asynchronous data fetching with Axios and optimized **DOM** manipulation.
- **Collaborative Development:** Partnered closely with UX/UI designers and backend developers to iterate on product features, integrating design mockups into interactive **React.js** components aligned with backend APIs for seamless user experiences.
- **System Integration:** Contributed to a new patient management system by securely integrating APIs with **React.js**, optimizing data flow for efficient and secure user interactions.

Web Developer - WorldTv Studio | April 2022 - September 2022

- **Front-End Development:** Created visually appealing websites using **HTML**, **CSS**, **JavaScript**, and **jQuery**, focusing on responsive design and user-friendly interfaces.
- **Performance Optimization:** Improved site performance by implementing image compression and script minification, resulting in a 20% increase in site speed and user engagement.
- **Animation and Interactivity:** Developed custom animations and interactive elements using **CSS3** and **JavaScript**, enhancing the visual appeal and functionality of client websites.
- **User Experience Enhancements:** Implemented user experience best practices to optimize navigation, accessibility, and overall usability, contributing to improved client satisfaction and site performance metrics.

PROJECTS:

Healthcart - Front-End Development

Tech Stack - React.js, Redux, CSS, Tailwind CSS

- Developed Healthcart, helping doctors effortlessly manage all patient details, from vitals and medications to personal info and video calls.
- Improved patient record management efficiency by 40% with intuitive and dynamic interfaces.

- Utilized **React.js** and FHIR to ensure smooth and reliable patient record handling and storage.

AI Chat Bot - Front-End Development

Tech Stack - React.js, Redux, CSS, Tailwind CSS, Three.js, Azure

- Built an AI chatbot for doctors to access 100% of patient records, including meds, appointments, and vitals.
- Developed a responsive AI chat app, improving patient info management by 40% with FHIR and Chat-GPT.
- Used **React.js** and Three.js for client-side operations and 3D model handling.

AION Web App(PWA) - Front-End Development

Tech Stack - HTML, CSS, Javascript, Tailwind CSS, Service workers

- Utilized FHIR to retrieve and update appointment records and save clinical notes.
- Employed **JavaScript** for dynamic data fetching and display on web pages.

EDUCATION:

Bachelor Of Science

Indira Gandhi National Open University

June 2021 - July 2024

High School And Senior Secondary School

Acquired 85% in class 12TH

Acquired 82% in class 10TH

April 2016 - May 2020
